Amendments to Overcome Objections to Allowable Claims 31, 32, 51, and 53

The Examiner's recognition of the patentability of claims 31, 32, 51, and 53 is appreciated. It is respectfully submitted that the rejections of claims 21-30, 33-50, 52, and 54-64 are in error, and that those claims are patentable as well, for at least the reasons set forth in previous replies. Nevertheless, solely to advance the prosecution of allowable claims 31, 32, 51,

and 53 to issuance, amendments are presented to overcome the objections and present the allowable claims rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As set forth in the **Amendments to the Claims and Listing of Claims** sections of this paper, claims 21, 25, 29, 30, 32, 41, and 48 are amended, claims 22-24, 31, 33-35, 46, 47, 50-53, and 56-64 are canceled, and claims 65-73 are added. No new matter has been introduced by such amendments, which are fully supported by the original disclosure. The amendments:

- Rewrite claim 21 to incorporate and present allowable claim 31 and intervening claims 24 and 22 in independent format;
- Rewrite claim 41 to incorporate and present allowable claim 51 and intervening claim 47 in independent format; and
- Add claim 65 to incorporate and present allowable claim 53 and intervening claim 47 in independent format within the text of former claim 41.

Claims 25, 29, 30, and 32 are amended to depend directly or indirectly from amended claim 21, which corresponds to allowable claim 31. Following amendment, claims 25-30, 32, and 36-40 depend from now allowable claim 21, and are allowable for at least the reason as former claim 31 (now amended claim 21).

Claim 48 is amended to depend directly from amended claim 41, which corresponds to allowable claim 51. Following amendment, claims 42-45, 48, 49, 54, and 55 depend from now allowable claim 41, and are allowable for at least the reasons as former claim 51 (now amended claim 41).

Claims 66-73 depend from new claim 65, which corresponds to allowable claim 53 and are patentable for at least the reasons as former claim 53 (now new claim 65).

Because the basis for the objections to allowable claims 31, 32, 51, and 53 have been removed and all requirements for the allowance of those claims as set forth in the October 15, 2008, Office action have been satisfied, the allowance of amended claims 21, 25-30, 32, 36-45, 48, 49, 54, 55, and 65-73 is respectfully requested.

Advisory Action of June 3, 2009

This paper is an amendment of and replaces the reply filed April 15, 2009, the amendments of which were denied entry pursuant to an advisory action dated June 3, 2009. Claims 33-35, 50, and 52 have been canceled, and claims 72 and 73 presented as new in the April 15, 2009, reply are omitted from this amended reply. Accordingly, all issues identified in the June 3, 2009, advisory action have been mooted by the amendments set forth herein.

Conclusion

In view of the reasons given above, reconsideration of the pending application and the timely allowance of pending claims 21, 25-30, 32, 36-45, 48, 49, 54, 55, and 65-73 are respectfully requested.

It is believed that this paper addresses all of the rejected claims and other matters sufficiently to support the allowance of all of the pending claims. The October 15, 2008, Office action contains a number of statements potentially reflecting characterizations of various claims, supporting descriptions, and/or patent or patent application references, but regardless of whether any such statements are addressed in this response, the Principal (as defined in 37 C.F.R. § 1.32(a)(3)) declines to automatically subscribe to any statement or characterization in the Office action. Although the Examiner's rejection of claims 21-64 has been traversed as set forth above without reference to many of such statements, all rights to dispute statements regarding such rejections later in any subsequent applications or causes of action relating to this application or any other application are expressly reserved.* Accordingly, the absence of a reply to a specific rejection, issue, or comment does not signify agreement with or concession of that rejection, issue, or comment. In addition, because the arguments made above may not be exhaustive, there may be reason for patentability of any or all pending claims (or other claims) that have not been expressed. Nothing in this paper should be construed as conceding any issue with regard to any claim except as specifically and expressly stated in this paper, and the

* In particular, the Examiner's rejections of the dependent claims have not been addressed herein apart from their respective independent base claims, but all rights to dispute statements regarding such rejections later in this or any subsequent applications or causes of action relating to this application or any other application are expressly reserved.

amendment of any claim should not be construed as conceding the unpatentability of the claim prior to amendment except as specifically and expressly stated in this paper.
